#### Overview

Companies are increasingly realizing it is not if, but when a breach occurs. Hackers are getting more sophisticated, and the troves of information companies house larger and larger. This unique, interactive data breach simulation will help you understand the role legal plays in an incident, and prepare your organization for a breach. We will address how to handle tricky legal notice situations and multijurisdictional notice law by walking you through a step-by-step breach experience. We will look beyond US state laws, and cover issues facing global companies impacted by GDPR, as well as those impacted by HIPAA.
