- 9 a.m. - 12 p.m. CYBER2030 program.

The Big Bang: Data Privacy in Cyberspace

The Internet has created an expansive universe of personal information about our identities, which when analyzed, can predict our behavior and preferences. Laws require businesses to safeguard personal information, and consequences for non-compliance are undergoing a sea change at the levels of law, policy and technology. The black hole of the data privacy conundrum is one of the greatest issues of our time. Will emerging technologies such as artificial intelligence and quantum computing be our North Star and change how personal data is collected and analyzed? Will growing pressures with nation-state adversaries drive organizations to harden their digital defenses? Join us as we explore these issues and more.

Keynote Speaker: Michael Chertoff

Secretary, U.S. Dept. of Homeland Security (2005 - 2009)
Author, *Exploding Data: Reclaiming Our Cyber Security in the Digital Age*
Co-Founder and Chairman, *The Chertoff Group*

*** Meet Michael Chertoff during our exclusive book signing from 8 - 9 a.m. and get your autographed copy of *Exploding Data!* ***
