

Silicon Valley Space Week

Satellite to Cell Connectivity - Market Expectations and Technology

10.17.2023 | 3:45 PM - 4:30 PM

Focused on analyzing next-generation satellite technologies and the current business environment, Satellite Innovation runs October 17-18, 2023. Providing deep insight into dynamic solutions in space defense the MilSat Symposium constitutes the latter half of Silicon Valley Space Week (SVSW). Join the MilSat Symposium October 19-20, 2023.

At **Satellite Innovation**, participants delve into the prospective advancements in the space-based business realm, encompassing novel communication tools, earth observation, and space science. This occasion amalgamates progressive innovations with pragmatic applications, translating customer issues into tangible technical resolutions.

Numerous experts from various specialties within the Satellite Industry will share their insights, enabling attendees to submerge themselves in groundbreaking technologies and contemporary business trends. Our aim is to equip you with connections, knowledge, and technical comprehension, empowering you to accelerate disruption and innovation, and expand your enterprise.

Agenda

Satellite to Cell Connectivity - Market Expectations and Technology

Moderator:

- Brian Weimer: Corporate Partner & Communications Team Leader, Sheppard Mullin

Speakers:

- Dr. Anton Monk: VP & CTO of Wireless Initiatives, Viasat
- Greg Pelton: CTO, Iridium Communications
- Jaume Sanpera: Founder and CEO, Sateliot
- Parthasarathi "Parth" Trivedi: CEO & Co-Founder, Skylo Technologies
- George Giagtzolou: Vice President of Strategy, Omnispace
