

I Robot: Legal Implications of the Rise of AI and Machine Learning

08.03.2023 | 10-11 AM

Event Sponsor: NAA

The bots are taking over! AI has fundamentally changed how organizations do business. Business operators, large and small, have implemented some form of AI and machine learning into their daily operations. From smart communities to business policy-writing, AI and machine learning can do it all! But just because the technology is available, does it mean it should be used? This session will examine the legal implications of using AI and machine learning in your operations from the perspectives of data privacy, liabilities, intellectual privacy rights, technology data strategies, and more.

Speakers:

- Wynter Deagle: Partner, Sheppard Mullin
- Angel Baltimore: SVP of Information Technology, NAA
