*SPACE IS LIMITED

When it comes to the utilization of artificial intelligence in the healthcare industry, it is an exciting and innovative time. However, there are unique legal risks and challenges associated with integrating AI into a healthcare business. There are risks in using AI and there are risks in not using AI, which will likely soon be part of the standard of care. It is important to think ahead, while also understanding and navigating the range of evolving legal and business considerations. The patchwork framework of regulation is quickly developing, as is the legal landscape and no payor, provider or stakeholder wants to be left behind. Join us for a facilitated, interactive roundtable discussion with healthcare industry leaders where we will discuss various opportunities, challenges and issues related to the state of AI in healthcare and together, look beyond the corners to explore what's next.

Who Should Attend

Leaders of healthcare organizations, including payors, hospitals and health systems, physician organizations and technology companies, including Chief AI Officers, Chief Legal Officers and General Counsel, Chief Innovation Officers and others who are charged with exploring and rolling out AI products within the organization and/or making decisions about AI.

Additional Healthy AI Roundtable Series Locations

Our Healthy AI Series is also taking place in Sheppard Mullin's San Francisco Office in February 2025. If you are unable to attend in Houston, please consider joining us in San Francisco, or feel free to refer a colleague. For more information on the San Francisco program, please contact Felicia Cammock via email.
