Raymund is a patent agent in the Vorys Houston office and a member of the intellectual property (IP) group. He has over two decades of experience preparing and prosecuting United States and foreign patent applications in chemistry, life sciences and related fields. In particular, he has significant experience in petrochemicals, lubricants, antibody therapeutics, medical devices, polymer packaging, small molecule diagnostics and therapeutics, liposome delivery systems, nutraceuticals, green fuels and food products. Raymund is also experienced in conducting patentability and freedom-to-operate searches and analysis, as well as assisting attorneys in developing claim construction arguments.

Raymund is a leader of the firm's assessment of artificial intelligence tools for patent practice.

Prior to entering law, Raymund conducted academic research in reactions of nitric oxide with myoglobin. Results of his research have been published in journals such as *Biochemistry*, *Biophysical Chemistry* and *The Journal of Inorganic Biochemistry*.

Raymund received both his B.A. and his Ph.D. in biochemistry from Rice University.

Raymund is not licensed to practice law in any state and does not provide legal services.
