6.1.2012

This 1-hour webinar will address critical issues in the e-discovery process where decisions can greatly impact the costs or outcome of the case. Each of these issues will include a discussion around risk assessment. Recommended approaches for resolving these issues based on risk tolerance will also be discussed. The key decision areas will include:

- Preservation & Proportionality
- Self (aka custodial) identification and collection
- Maintaining Privilege
- Review Strategies
- Impact of collection strategies on review
- Use of analytics and predictive coding
- Reducing review costs through staffing and strategy
- Quality control plans
- Corporate strategies for reducing risk and cost
