8.21.2019

Attorneys Robin Amicon, David Edelstein, Mairi Mull and Kristin Watt will hold a webinar on August 21, 2019. The webinar, titled "New Rules for the Management of Hazardous Waste Pharmaceuticals are Effective...Now What?," covers the U.S. Environmental Protection Agency's (USEPA) new rules under the Resource Conservation and Recovery Act (RCRA).

These rules officially become effective August 21, 2019 and may require significant operational changes for many providers. Questions remain open regarding their applicability and the specifics of their implementation at the state level. Join the Vorys health care team with their colleagues in the environmental practice group to learn more about the status and impact of this developing regulatory scheme, as well as what can be done to best position an organization for compliance.
