**AUTHORED ARTICLE** | 3.27.2026

The Vorys health care group has drafted a white paper on the Ohio Auditor of State (auditor) Medicaid compliance examinations, focusing on what providers can expect, how to prepare and the trends emerging from the auditor's recent reviews.

#### More specifically, the white paper covers:

- How the auditor conducts Medicaid compliance examinations and the strict timelines providers must meet
- Common documentation and billing issues identified during 2025 behavioral health audits
- The auditor's increasing use of data analytics and extrapolation to identify and expand findings
- Strategic steps providers should take — such as engaging experienced counsel early, preparing organized record submissions and treating the final response like a legal brief—to reduce exposure and avoid adverse outcomes
