

Blockchain and Digital Assets

Blockchain and digital assets are transforming finance, commerce, and technology. At White and Williams, our Blockchain and Digital Assets Practice offers in-depth legal and technical insight across the ecosystem, including cryptocurrency, Distributed Ledger Technology (DLT), NFTs, and Web3 applications. We help clients navigate regulatory frameworks, develop compliant token strategies, and implement custom blockchain solutions designed with compliance and scalability at their core. Our experience extends from startups to established market leaders building innovative platforms and decentralized systems.

By collaborating across practice areas, our team addresses the full range of legal and business challenges our clients face. We provide transactional and regulatory counsel, litigation support, and strategic advice on matters including securities law, licensing, Intellectual Property, smart contracts, data privacy, employment, and tax. With a strong understanding of both the technology and the law, we enable clients to innovate with confidence in a rapidly evolving digital environment.
